

KAVLI SCICOMM ESSENTIALS Certificate

Based on strong interest from Kavli Institute members to develop communications and public engagement knowledge and skills, The Kavli Foundation's Science and Society team launched the "Kavli SciComm Essentials" Series. A diverse set of experts deliver sessions in the Kavli SciComm Essentials series - a curriculum of virtual science communication and public engagement webinars and workshops.

The Kavli Foundation honors the time and effort community members make as they participate in this program with the ***Kavli SciComm Essentials Certificate***.

The Kavli SciComm Essentials Certificate will:

1. Support Kavli Community members in developing a well-rounded set of skills that are necessary to support effective ways to share your science and/or engage people with you and your science.
2. Provide flexibility in the types of trainings you can choose to help tailor the experience to your needs and preferences
3. Provide a tangible mechanism to be professionally recognized. The foundation will share the certificate with your respective Kavli Institute Director, and it can be listed on your C.V.

Eligibility for this certificate will require participation in 50% of the events - at least two sessions from each of the three categories (for a total of six sessions).

If you are interested in participating in the Certificate program, please notify Lauren Budenholzer at lbudenholzer@kavlifoundation.org.

Please note that the current curriculum includes events through the end of 2022. Based on interest and feedback, we may repeat and/or add more sessions in 2023. The certificate requirements can be met over multiple years.

DESIGNING FOR PEOPLE

Science communication and engagement is centered on relationships that people build and nurture with each other. These workshops and webinars focus on the human elements essential to effective communication and engagement, such as building trust, incorporating empathy, and strengthening our awareness of how personal experiences can shape viewpoints, including our own.

- Creating Connections March 22, 2022
- A Compassionate Scientist's Toolkit^U March 29, 2022
- Learning is Personal May 24, 2022
- Media Interviews: Webinar and Discussion^U June 7, 2022
- Culturally Relevant Science Communication^U October 11, 2022
- Building a Community: Mobilizing your Peers and Leveraging your Resources^U November 2, 2021
- Understanding People's Relationship with Science: A Conversation with Polling and Survey Experts^U December 7, 2021

DEVELOPING YOUR PRACTICE

How can you develop a communication or engagement practice in your own setting? In this group of webinars and workshops, participants can learn from a variety of evidence-based approaches to create a tailored engagement plan.
